SAN ANTONIO BREAST CANCER SYMPOSIUM™
Greece 2017

13 - 14 January 2017
Divani Caravel Hotel
Athens

Organized by

Under the auspices of

www.bsabcs.gr
Welcome address

Dear Colleagues,

The Organizing Committee of the San Antonio Breast Cancer Symposium (SABCS), and the Cretan Association of Biomedical Research welcomes you to “Best of SABCS - Greece 2017”, the 2nd edition of Best of SABCS to be held in Greece.

The SABCS, now in its 39th year, is the premier conference for basic, translational, and clinical cancer research professionals. It is well known for presenting the latest breast cancer data from all over the world.

The Best of SABCS allows professionals, who are unable to travel to San Antonio, the opportunity to experience and discuss the research and advances with colleagues and key opinion leaders.

Attendees to the Best of SABCS program will receive the most current information on breast cancer research presented in the original format delivered at the meeting in San Antonio in December 2016. You will learn of the current advances in breast cancer research that are changing clinical practice for the benefit of patients.

Principal subject areas of the “Best of SABCS - Greece 2017” program include:

- Advances in the basic and translational research of breast cancer
- Latest research on systemic therapy of early breast cancer and treatments for advanced breast cancer
- Updates in surgery and radiation therapy
- A comprehensive review of the studies reported in 2016 on every field of breast cancer research

The SABCS has always been a forum for interaction between individuals involved with all aspects of breast cancer research and care and it is envisioned that this camaraderie will also be experienced at “Best of SABCS - Greece 2017”.

We would like to extend recognition and thanks to the supporters of the Best of SABCS: Hellenic Society for Medical Oncology, Hellenic Society of Breast Surgeons, Hellenic Society of Surgical Oncology, Hellenic Society for Therapeutic Radiation Oncology and Hellenic Oncology Research Group, for realizing the importance of education and who make it possible to bring this meeting to Greece.

On behalf of the organizing committee of the SABCS, and the Cretan Association of Biomedical Research, we would like to wish you fruitful conference.

Vassilis Georgoulias
Emeritus Professor of Medical Oncology
School of Medicine, University of Crete
President of Cretan Association of Biomedical Research

Emmanouil Saloustros
Medical Oncologist
General Hospital of Heraklion
“Venizelio”, Heraklion, Crete
Scientific Agenda

Friday 13 January 2017

17:00-17:05 Welcome and introduction
V. Georgoulias

17:05-17:40 Session 1
Chairs: Ch. Emmanouilides, E. Lianidou
Speaker: G. Rigakos
S4-01. A novel BRD4 inhibitor enhances endocrine therapy efficacy and circumvents endocrine-resistance in estrogen receptor-positive breast cancer models.
S4-02. The Y537S ESR1 mutation is a dominant driver of distant ER-positive breast cancer metastasis.
Speaker: A. Koumarianou
S4-03. Targeted and selective degradation of estrogen receptor (ER) alpha by PROTACs.
S6-04. The PI3K inhibitor, taselisib, has enhanced potency in PIK3CA mutant models through a unique mechanism of action.
S4-06. Biological effects of abemaciclib in a phase2 neoadjuvant study for postmenopausal patients with hormone receptor positive, HER2 negative breast cancer.

17:40-18:15 Session 2
Chairs: G. Fountzilas, H. Kourea
Speaker: P. Economopoulou
S1-08. Prognostic associations of tumor-infiltrating lymphocytes (TIL) in metastatic HER2-positive breast cancer (BC) treated with trastuzumab and pertuzumab: A secondary analysis of the CLEOPATRA study.
S1-09. Evaluation of tumor-infiltrating lymphocytes (TILs) as predictive and prognostic biomarker in different subtypes of breast cancer treated with neoadjuvant therapy - A meta-analysis of 3771 patients.
Discussant: E. Razis: Should TIL information be included in the pathology report?

18:15-18:30 Coffee break
18:30-19:10 **Session 3**

**Chairs:** D. Pectasides, A. Kotsakis

**Speaker:** N. Pistamaltzian

- S1-07. Immune sculpting of the triple negative breast cancer genome.
- S1-01. Whole exome and transcriptome sequencing of resistant ER+ metastatic breast cancer.
- S1-10. Clinical implications of somatic mutations in post-menopausal early-stage estrogen receptor (ER)-positive HER2-negative breast cancer (BC): Results from the BIG 1-98 study.

**Discussant:** K. Papazisis: Sequencing breast cancers: ready for prime time?

19:10-20:00 **Session 4**

**Chairs:** V. Barbounis, I. Boukovinas

**Speaker:** N. Tsoukalas

- S5-01. DCIS biological risk profile predicts risk of recurrence after breast conserving surgery in a Kaiser Permanente NW population.
- S4-04. Tumor microenvironment of metastasis (TMEM) score is associated with early distant recurrence in hormone receptor (HR) positive, HER2-negative early stage breast cancer (ESBC).

**Speaker:** A. Tzovaras

- S6-05. Comprehensive comparison of prognostic signatures for breast cancer in TransATAC.
- S3-03. PAM50 intrinsic subtype as a predictor of pathological complete response following neoadjuvant dual HER2 blockade without chemotherapy in HER2-positive breast cancer: First results of the PAMELA clinical trial.

**Discussant:** A. Nikolaidi: Molecular signatures in breast cancer

20.00 **Award for life time achievement in breast cancer care**
Saturday 14 January 2017

09:00-09:45  **Session 5**  
**Chairs:** A. Ardavanis, I. Drositis  
**Speaker:** V. Ramfidis  
Greek studies and worth discussing posters I.  
**Speaker:** M. Nikolaou  
Worth discussing posters II.

09:45-10:20  **Session 6**  
**Chairs:** H. Linardou, I. Mountzios  
**Speaker:** A. Markou  
S3-01. IMENEO: International MEta-analysis of circulating tumor cell detection in early breast cancer patients treated by NEOadjuvant chemotherapy.  
S3-02. Plasma microRNA levels for predicting therapeutic response to neoadjuvant treatment in HER2-positive breast cancer: Results from Neo-ALTTO.  
**Discussant:** E. Lianidou: Circulating biomarkers in breast cancer.

10:20-11:15  **Session 7**  
**Chairs:** V. Venizelos, M. Kontos  
**Speaker:** H. Faliakou  
Worth-discussing posters III (focus on locoregional treatment of early breast cancer)  
**Speaker:** S. Lanitis  
S3-07. Impact of radiotherapy on complications and patient-reported satisfaction with breast reconstruction: Findings from the prospective multicenter MROC study.  
S3-08. Radioactive seed localization versus wire guided localization of nonpalpable invasive and in situ breast cancer: A Danish multicenter randomized controlled trial.  
S2-07. Sentinel node detection after neoadjuvant chemotherapy in patient without previous axillary node involvement (GANEA 2 trial): Follow-up of a prospective multi-institutional cohort.  
**Discussant:** I. Sanidas: Evaluation and management of axilla in early breast cancer.
11:15-11:30 Coffee break

11:30-12:40 Session 8
Chairs: Ch. Kourousis, Ch. Panopoulos

Speaker: V. Voulgaris

S2-01. Breast cancer risks associated with mutations in cancer predisposition genes identified by clinical genetic testing of 60,000 breast cancer patients.

S2-03. Does BRCA status affect outcome in young breast cancer patients? Results from the prospective study of outcomes in sporadic and hereditary breast cancer (POSH).

Speaker: G. Lypas

S2-02. The landscape of somatic genetic alterations in BRCA1 and BRCA2 breast cancers.

S6-01. BRCA1 methylation status, silencing and treatment effect in the TNT trial: A randomized phase III trial of carboplatin compared with docetaxel for patients with metastatic or recurrent locally advanced triple negative or BRCA1/2 breast cancer (CRUK/07/012).

S2-04. RANK ligand as a target for breast cancer prevention in BRCA1 mutation carriers.

Speaker: F. Stavridi

S2-05. Efficacy and tolerability of veliparib (V; ABT-888) in combination with carboplatin (C) and paclitaxel (P) vs placebo (Plc)+C/P in patients (pts) with BRCA1 or BRCA2 mutations and metastatic breast cancer: A randomized, phase 2 study.

S2-06. DNA repair deficiency biomarkers and MammaPrint high1/(ultra)high2 risk as predictors of veliparib/carboplatin response: Results from the neoadjuvant I-SPY 2 trial for high risk breast cancer.

12:40-13:15 Session 9
Chairs: Ch. Christofyllakis, N. Androulakis

Speaker: M. Theoxari

S3-05. Integrated analysis of multidimensional genomic data on CALGB 40601 (Alliance), a randomized neoadjuvant phase III trial of weekly paclitaxel (T) and trastuzumab (H) with or without lapatinib (L) for HER2-positive breast cancer.

S3-06. A phase III trial evaluating pCR in patients with HR+, HER2-positive breast cancer treated with neoadjuvant docetaxel, carboplatin, trastuzumab, and pertuzumab (TCPH) +/- estrogen deprivation: NRG oncology/NSABP B-52.

Discussant: A. Koutras: Neoadjuvant chemotherapy for HER2-positive breast cancer.

13:15-14:10 Session 10
Chairs: N. Kentepozidis, I. Karaitianos

Speaker: E. Lianos

S1-03. First results from the multicenter phase III DATA study comparing 3 versus 6 years of anastrozole after 2-3 years of tamoxifen in postmenopausal women with hormone receptor-positive early breast cancer.

S1-04. Optimal duration of extended letrozole treatment after 5 years of adjuvant endocrine therapy; results of the randomized phase III IDEAL trial (BOOG 2006-05).

S1-05. A randomized, double-blinded, placebo-controlled clinical trial to evaluate extended adjuvant endocrine therapy (5 years of letrozole) in postmenopausal women with hormone-receptor-positive breast cancer who have completed previous adjuvant endocrine therapy: Initial results of NRG oncology/NSABP B-42.

Speaker: M. Bakogeorgos

S6-03. DBCG 07-READ: A randomized phase III trial comparing six cycles of docetaxel and cyclophosphamide (DC) to three cycles of epirubicin and cyclophosphamide followed by three cycles of docetaxel (EC-D) in patients with early breast cancer.

S6-07. Double blinded validation study to assess performance of IBM artificial intelligence platform Watson for oncology in comparison with Manipal multidisciplinary tumour board--First study of 638 breast cancer cases.

Discussant: Ch. Christodoulou: Optimal duration of systemic treatment for early breast cancer.

14:10-15:00 Lunch break
15:00-15:40  **Session 11**  
**Chairs:** S. Kokolyris, N. Ziras  
**Speaker:** E. Kontopodis  

S3-04. Primary analysis of PERTAIN: A randomized, two-arm, open-label, multicenter phase II trial assessing the efficacy and safety of pertuzumab given in combination with trastuzumab plus an aromatase inhibitor in first-line patients with HER2-positive and hormone receptor-positive metastatic or locally advanced breast cancer.

S1-02. PrECOG 0102: A randomized, double-blind, phase II trial of fulvestrant plus everolimus or placebo in post-menopausal women with hormone receptor (HR)-positive, HER2-negative metastatic breast cancer (MBC) resistant to aromatase inhibitor (AI) therapy.

S4-07. BELLE-3: A Phase III study of buparlisib + fulvestrant in postmenopausal women with HR+, HER2-, aromatase inhibitor-treated, locally advanced or metastatic breast cancer, who progressed on or after mTOR inhibitor-based treatment.

Discussion: A. Alexopoulos: Optimizing hormonal treatment for metastatic breast cancer.

15:40-16:30  **Session 12**  
**Chairs:** P. Kosmidis, Ch. Kalofonos  
**Speaker:** P. Katsaounis  

S5-03. Menopausal symptoms as predictors of long-term adherence in the International breast cancer intervention study (IBIS-1).

S5-06. Randomized, placebo-controlled trial of duloxetine for aromatase inhibitor (AI)-associated musculoskeletal symptoms (AIMSS) in early stage breast cancer (SWOG 1202).

**Speaker:** S. Peroukidis

S5-07. Aromatase inhibitors and endothelial function: Is there an association with early cardiovascular disease?

S6-02. The efficacy and safety of the addition of ibandronate to adjuvant hormonal therapy in postmenopausal women with hormone-receptor positive early breast cancer. First results of the TEAM IIB trial (BOOG 2006-04).

**Discussant:** E. Timotheadou: Hormonal therapy: not as simple as a pill.

16:30-17:10  **Session 13**  
**Chairs:** Ch. Papadimitriou, I. Athanasiadis  
**Speaker:** S. Karageorgopoulou  

S5-02. Scalp Cooling Alopecia Prevention trial (SCALP) for patients with early stage breast cancer

S5-04. Low-fat dietary pattern and breast cancer overall survival in the women’s health initiative dietary modification randomized controlled trial.

S5-05. Impact of pre-operative exercise on breast cancer gene expression.

**Discussant:** F. Poulakaki: Life-style modification adjuvant therapy.

17:10-18:10  **Session 14: 2016 in review.**  
**Chairs:** I. Varthalitis, Α. Polyzos  
**Speaker:** N. Xenidis  

Best of the year 2016: translation research

**Speaker:** H. Galani  
Early breast cancer

**Speaker:** Z. Saridaki  
Advanced breast cancer

18:15  **Closing Remarks**

General Information

Organized by

Symposium Venue
Divani Caravel Hotel,
2 Vasileos Alexandrou Str., 16121, Athens
T: 210 7207000

Under the auspices of:

Registration Fees
Free

Official Language
The official language of the meeting is Greek.

Certificate of attendance
Based on the latest circular of the National Drug Organization the Event is required to use an attendance tracking system. All registered participants will receive name badges, which they are kindly requested to wear at all times. Each badge will have a barcode for monitoring the hours of attendance.

By the end of the event a certificate will be given to those who have attended at least 60% of the total hours of the scientific Program. The number of credits of Continuing Medical Education (CME-CPD) to be administered to the participants will be calculated on the basis of monitoring time.

The event has been awarded by
Panehellenic Medical association (PIS) with 8 CME - CPD credits
